

GPRS/GPS Vehicle Tracking System

Client: Nonthaburi Provincial Police

Period of Appointment: 2004 - 2005

AMP Consultants Ltd. and Infinire Co.,Ltd. have been commissioned by the Nonthaburi Provincial Police to Develop Tracking System to monitor and analyse vehicle's behaviour by GPS (Global Positioning Satellites - for identifying vehicle's location) and GPRS (General Packet Radio Service-for communication with control centre). This system will enable quick response to incidents investigation and analysis of criminal cases in responsible area to improve police service to community. Work consists of installation of tracking module unit on vehicle and implementation of centralized control software. AMP Consultants Ltd.developed the centralized control software for real-time monitoring and analysis of patrol operation. Display of vehicle location is based on 1:4,000 Nonthaburi Map.
